

FastLock Disposable pacing cable

Eliminate the problems associated with reusable cables

Reliable

Using a new single use cable eliminates potential for failure associated with reusable cables. Every FastLock cable has function verified by 100% quality control procedures.

Safer

Eliminates potential for cross contamination associated with reusable cables. Unique pushbutton locking mechanism provides a positive secure connection. Color coding at both connection points reduces potential for error.

Cost effective

Control costs by eliminating labor, reprocessing and variability of costs associated with reusable cables. Correctly identifies your patient costs.

FastLock Disposable pacing cable

Single Use Design

Safer, Reliable, Cost effective

At Medical Concepts Europe we are dedicated to providing comprehensive solutions for Temporary Pacing in Cardiac Surgery. Our dedication to this specific medical device technology allows us to improve quality, innovation and reliability resulting in superior patient care. We are committed to advancing the practice of medicine, by making advancements in technology for temporary pacing thus contributing to successful outcomes for every patient.

Please contact your local representative or MCE directly to find out more about our product portfolio. We look forward to the opportunity to explain the possibilities in person or explore for yourself at: www.medicalconcepts.eu
